# Hyundai Construction Equipment India Private Limited

<https://www.indiamart.com/hyundai-construction/>

We Hyundai Construction Equipment India Private Limited are the Manufacturers of the Products Forklift Truck, Construction Equipment etc.

## About Us

Hyundai Construction Equipment has grown across the world as a leader in construction equipment, mining solutions and material handling equipment. The group has a presence across Africa, Asia, CIS, Middle East, Russia, North and South America.

Hyundai Construction Equipment India Pvt. Ltd (HCEIPL) was established in 2007 with an aim to bring the latest technology in construction equipment and mining solutions to the Indian market. The company inaugurated the India plant in Chakan Maharashtra in 2008 to ensure the best offerings for the Indian market. Hyundai's first excavator was rolled out in India the same year. Since then, Hyundai Construction Equipment India has continued full steam ahead, setting new benchmarks for the industry to follow. Within a span of 8 years, Hyundai India dominated the excavator market with No 2 position in terms of sales. This can be gauged from the fact that the company saw a rollout of more than 25,000 machines from its India plant, a feat that is fastest in the industry. To meet the demand of the burgeoning industry, Hyundai launched the Material Handling Equipment (MHE) business. Hyundai's commitment to provide world class equipment that meets the highest global standards, which is reliable as well as efficient, has earned the brand a strong following in the industry and a place of pride among its peers.
